

# “V” Blade Orchard Float

**Description:** The “V” blade orchard float is designed to remove high spots from the middle of the orchard floor left by harvest machinery. Our “V” blade has a category 2 hitch with replaceable hardened bushings. It has curved blades which provide a more efficient cutting angle for the reversible blade. The formed angles also stiffen the blades so that the blades can be made of lighter materials. Our float uses high strength, light weight design that will allow smaller tractors to use bigger floats and helps put additional steel on the ground. The additional weights is not needed with modern tractors that have a 3pt down pressure.

## Specifications

- Grader Blade: ½” x 6’
- Side wear plates: ¾” AR plate
- Side plate height: 10”
- Blade height: 10”
- Replaceable hardened bushings on hitch

## Options

- Roller - works well on soft soil

Models	Width	Hitch	Weight (lbs)
V-Blade	96”	Cat. 1 & 2	-
-	120”	Cat. 2	1335
-	144”	Cat. 2	1570
-	168”	Cat. 2	1805
-	192”	Cat. 2	-
